

Security Bulletin for XONA Critical System Gateway (CSG)

Bulletin ID	CVE	Date Published	Severity
XONA20-01	CVE-2020-9497	July 2020	Low

Summary

Apache Guacamole 1.1.0 and older do not properly validate data received from RDP servers via static virtual channels. If a user connects to a malicious or compromised RDP server, specially-crafted PDUs could result in disclosure of information within the memory of the guacd process handling the connection.

Affected Products

Product	Version	Hardware
XONA Critical System Gateway	3.2.5-2 and previous	ML-350

Solution

A security update for this issue is available in the 3.2.5-3 release update file, released in July 2020. To receive this update, login to your support portal account on the XONAsystems.com website or contact us for assistance by email: support@xonasystems.com.
