

Security Bulletin for XONA Critical System Gateway (CSG)

Bulletin ID	CVE	Date Published	Severity
XONA20-02	CVE-2020-9498	July 2020	Low

Summary

Apache Guacamole 1.1.0 and older may mishandle pointers involved in processing data received via RDP static virtual channels. If a user connects to a malicious or compromised RDP server, a series of specially-crafted PDUs could result in memory corruption, possibly allowing arbitrary code to be executed with the privileges of the running guacd process.

Affected Products

Product	Version	Hardware
XONA Critical System Gateway	3.2.5-2 and previous	ML-350

Solution

A security update for this issue is available in the 3.2.5-3 release update file, released in July 2020. To receive this update, login to your support portal account on the XONAsystems.com website or contact us for assistance by email: support@xonasystems.com.
