Partner Program

XONA™ enables zero-trust instant secure access to critical infrastructure from anywhere. We are committed to helping, training, and building strong partnerships to allow our shared customers to flourish.

XONA is a purpose-built OT and critical infrastructure solution that enables partners to solve existing access and liability problems with their customers and third-party vendors. XONA's install-and-go deployment means customers are provisioned quickly and securely, accessing assets, fleets, facilities, and sites in a few hours. Enjoy considerable value-add capabilities that improve operating efficiencies, offer straightforward centralized management, and aid in cost-effective digital transformation for customers and partners.

WHY XONA

XONA brings instant access to assets to help resolve issues proactively, enables remote access to critical infrastructure, quickly patches systems through secure file management, prioritizes maintenance to maximize uptime, manages passwords, enables third-party vendor access, and reduces technology cost and complexity. Quickly provision users and their access in minutes, streamlining maintenance, adoption, and scalability.

Customers and partners alike choose XONA because we are proactive innovators, meet and exceed expectations, and are purpose-built for OT and critical infrastructure systems. Our extensive experience in cybersecurity helps customers meet and stay compliant with NERC-CIP, NIST 800-53, and ISA/IEC 62443 standards.

XONA's technology provides a wide variety of features and benefits, including:

- Attack surface reduction with protocol isolation
- Zero-trust by design
- Multi-factor authentication (MFA)
- Centralized remote access and monitoring
- Wait-rooms
- Moderated access
- No disruption to existing technologies or special configurations
- Helps eliminate Shadow IT
- Agentless, clientless, high availability architecture
- Restricts access to approved devices on a user and profile level
- Federated file management
- Video recordings for later playback
- No dependency on "phoning home" or cloud access
- Integrates with SIEMs and other security technologies

WIN TOGETHER

XONA delivers a high-value solution with minimal impact on partner and customer resources. Partners can expand their coverage, offerings, and capabilities to close more deals, show more value, boost productivity, and grow their business. Enjoy a collaborative environment that is dedicated to customer success

Strategic Partners: Expand product and service offerings, open and accelerate new revenue streams, and reach new markets with minimal effort.

Technology Alliances: Enhance applications and provide customers with a value-added and fully integrated solution. This category includes tech companies typically structured as joint marketing of products and some integration of offerings.

PROGRAM TIERS

Gold

These partners consider XONA's solutions an integral part of their business strategy, including setting and achieving revenue goals. These partners receive extensive benefits, including customized technology integrations, sales enablement, and full access and support from customer service, sales, and marketing teams. Joint and co-branded collateral creation are available.

Silver

These partners work closely with XONA's executives and enjoy sales and technical enablement and support from technical, sales, and marketing resources. Open to joint and co-branded collateral creation.

Bronze

These partners will be able to sell XONA's solutions with access to technical, sales, and marketing resources.

Authorized

These partners will be able to sell XONA's solutions with limited access to technical and marketing resources.

“Managing risk from these factors is different from the risk management of IT/traditional security. Bridging the gap between IT/OT is what allows us to effectively manage these concerns while driving innovation and preserving or improving profitability.”

ABOUT XONA

XONA enables frictionless user access that's purpose-built for operational technology (OT) and other critical infrastructure systems. Technology agnostic and configured in minutes, XONA's proprietary protocol isolation and zero-trust architecture immediately eliminates common attack vectors, while giving authorized users seamless and secure control of operational technology from any location or device. With integrated MFA, user-to-asset access controls, user session analytics, and automatic video recording, XONA is the single, secure portal that connects the cyber-physical world and enables critical operations to happen from anywhere with total confidence and trust.
